

LUMIWED DESIGN SYSTEM

Beautiful multilingual wedding websites, by design.

Quiet-luxury, gold-on-ivory. Warm and inclusive. The tokens, components, and ten wedding themes behind LumiWed — recreated from the [robin-scharf/rs-lumiwed](#) monorepo.

A single warm hue family

OKLCH, hue $\approx 30\text{--}45^\circ$. Background is warm ivory, never pure white; foreground is warm charcoal, never pure black. Status hues are darkened so white text on the fill clears WCAG AA — never lighten them.

shadcn-style primitives, reskinned warm

Each primitive reads the semantic tokens, so it travels into every wedding theme untouched.

Button

Pill-shaped, gold-forward. Rises 2px on hover, drops 1px on press.

Badge

Tier and RSVP-status pills, tones drawn from the semantic palette.

Villa Cimbrone

Ravello, Amalfi Coast · 12 September 2026

A soft luxury panel: gentle gradient, hairline warm border, and the signature primary-tinted glow.

Ten curated guest-site themes

The platform stays gold-on-ivory; only guest sites reskin. Wrap content in `.wedding-theme-shell[data-wedding-theme]` and every shared primitive adopts the palette.
